

3.)

Project Name	Website Malware Removal
Client Name	One of our most respected client
Industry	Lifestyle & Business
Challenges (Work)	Our Client reached out to us. The Japanese keyword hack heavily affected their 16 wordpress powered websites. The SEO & Online Reputation was heavily affected!
Type	Cyber Security [Website Penetration Testing]
Project Duration	4 Weeks
Outcome	We immediately removed everything that caused this immense hack. Our forensic team identified that the reason behind the hack is high use of backlinks . So we removed unknown backlinks and got their websites back. Then we implemented several

	protections. Client then migrated all websites to different hosting providers.
